Forget The Rest This Guide is the Best

Introducing:

Everything about dish installation for Sky, Freesat-HD and the Free channels!

Although it refers to "Sky" the information is applicable to all satellite transmissions. Do you know what size dish; what sort of cable; connectors, which receiver is best for in/outside the UK; how to align the dish; how to disguise the dish? Do you know about special disguised dishes such as the digiglobe? Are you planning to buy all the items to do it yourself?

Well, this eBook answers all those questions!

Over 120 pages of useful information and professional tips.

Do you understand the implications of a SKY-Plus system? Maybe you'd prefer to install the cables yourself before the installer comes. Perhaps you'd like to have wall plates, white, or brown cable instead of black? Or must it be linked to an apartment distribution system?

Must your dish go on the balcony? Will you paint the dish? Do you know how to use a ladder safely? Do you need planning permission? Can you even receive a signal in your area? Do you think the dish needs to be high up or will it work at ground level?

You really NEED to read this eBook before you spend any money. We don't WANT you to buy anything until you have a complete understanding of all the possibilities. This eBook is going to SAVE YOU MONEY AND TIME. That's guaranteed. And there's no risk because, if you don't like the eBook, we give you your money back! How many other dealers offer you so much information at such a small price with a money-back guarantee?

[Here is one review of this product:](#)

"Thank you, Thank you.

That cash I spent yesterday on the Installing Sky Digital TV manual is probably going to save my father at least £100 when they take the new sky digital system to France in March.

Friends paid the local satellite fitters in France, the equivalent of £100 each to get their systems aligned (not fitted!). Reading the manual last night I have already learned so much, details that will make purchasing the kit here in Wales a lot easier, and will head off problems in France - Cable speccing, alignment with minimal kit, little fitting tips. Wow! Well worth a few quid!

Fitting the satellite dish won't be a problem; the previous owner left the TV aerial on the roof, along with suitable brackets (checked against our Sky system here in Wales), therefore that side of it is sorted. Using your excellent manual will make the alignment and setup a lot easier than the alternative. The alternative being trial and error!"
